

BARRINGTON

First Level 1,743 sf
 Second Level 1,683 sf
 Total 3,372 sf

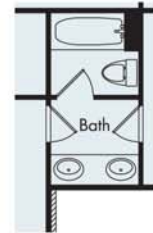

• OPTIONAL OWNER'S BATH

The two-story Barrington was designed with the family in mind. As guests enter from the front covered porch into the grand two-story foyer, they will feel the openness the home has to offer. The connected oversized family room with coffered ceiling detail, and large windows for plenty of natural light, is the perfect gathering place to catch up with family and friends. The open floor plan allows for easy flow from the family room to the kitchen to the dining room. An optional outdoor lanai is perfect for those warm summer days.

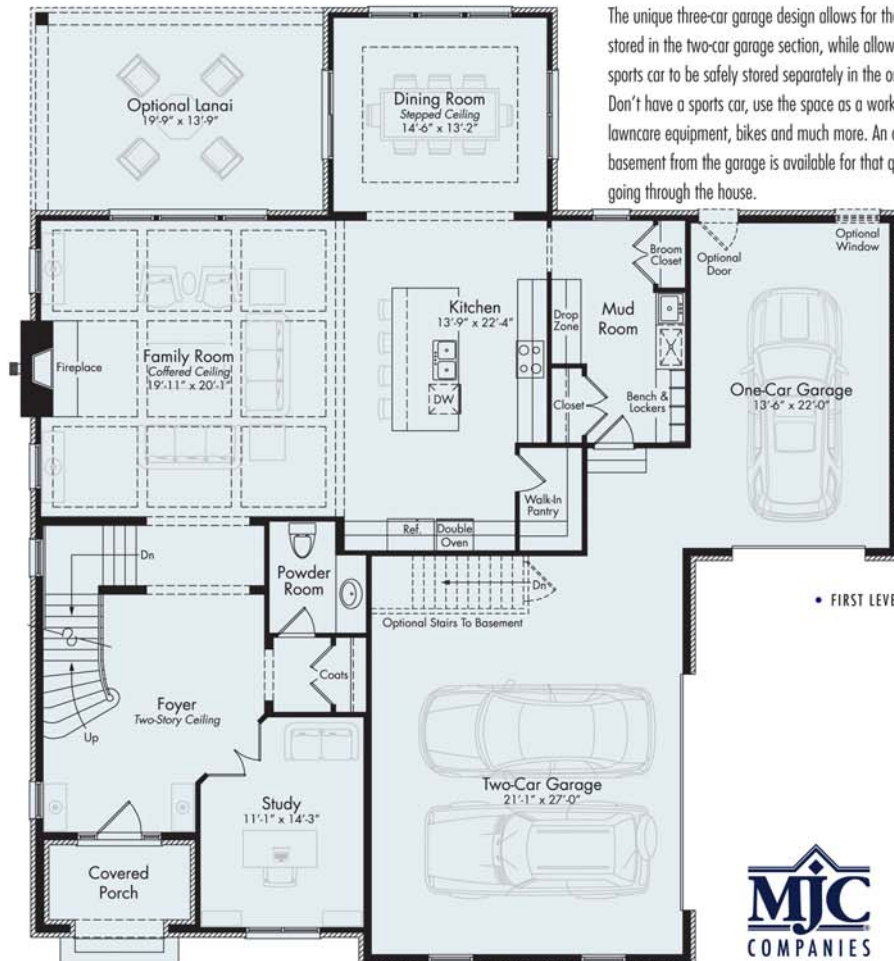

The second level, with four bedrooms, is the perfect retreat with a large owner's suite, private luxury bath and a generous sized double walk-in closet.

• SECOND LEVEL

• OPTIONAL JACK-N-JILL BATH

• FIRST LEVEL

The unique three-car garage design allows for the daily drivers to be stored in the two-car garage section, while allowing the classic or sports car to be safely stored separately in the one-car garage section. Don't have a sports car, use the space as a workshop, or as storage for lawncare equipment, bikes and much more. An optional stairs to the basement from the garage is available for that quick access without going through the house.
