

GRAND LOGAN II

| | |
|--------------|----------|
| First Level | 2,049 sf |
| Second Level | 1,595 sf |
| Total | 3,644 sf |

This family-friendly layout features versatile and comfortable entertaining and private spaces, taking this luxury home from ordinary to extraordinary. Entering the Grand Logan II, the impressive two-story foyer reveals the open floor plan. Flanking the entry is a parlor with cathedral ceiling and formal dining room, which connects to the expansive kitchen through a butler's pantry. The great room's warm fireplace and soaring ceiling draw you to the heart of the home. A library provides a cozy space for reading and relaxation. The large mud room includes a family closet, access to the laundry room and entry to the 3-car garage.

Upstairs, curved steps and French doors elevate the entry of the owner's suite, which includes a pan ceiling, twin walk-in closets and luxurious spa bath. An additional bedroom suite with a private bath is ideal for guests. A Jack-and-Jill bath with a double vanity joins two children's bedrooms, completing the second floor of the home.
